

Getting started with Human API

John Hancock has partnered with Human API to empower applicants to quickly and securely share their electronic health data.

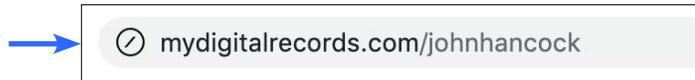

Before getting started, it is helpful if your clients collect their provider's patient portal system login credentials. A "patient portal" is a secure site where providers provide medical information related to medical visits, test results, health reminders, etc.

See below for additional information on how the Human API process works.

How it works

1 Share the Human API link

Send your clients to **mydigitalrecords.com/johnhancock** to begin the process. For added convenience, you can use the email template on page 3 when sending the link to your client.

2 Client enters basic information

Once your client has accessed the Human API site, they will be asked to provide some basic details (e.g., first name, last name, date of birth, and email address) **before clicking "Get Started"**

The form contains the following fields:

- First name:
- Last name:
- Date of Birth:
- Email:

At the bottom of the form is a blue "Get Started" button and a small logo that says "Powered by HUMAN API".

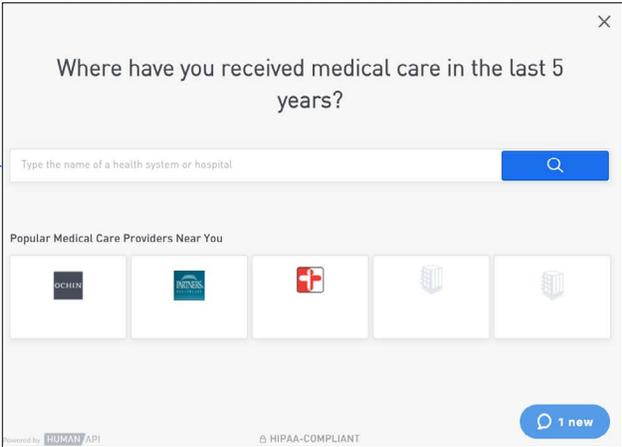

Tip

Have your clients gather a list of the providers they've seen in the past 5 years.

3 Connect accounts

a. Your client will search for their hospital system(s) or medical provider(s). They can also search by physician name.

Where have you received medical care in the last 5 years?

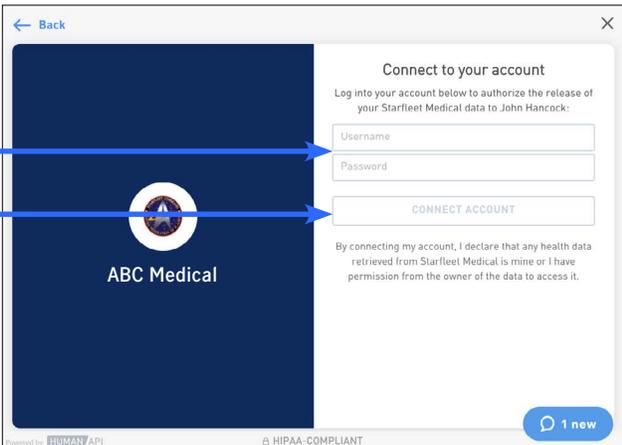

Type the name of a health system or hospital

Popular Medical Care Providers Near You

Powered by HUMAN API HIPAA-COMPLIANT 1 new

This screenshot shows a search interface. At the top, it asks "Where have you received medical care in the last 5 years?". Below this is a search bar with the placeholder text "Type the name of a health system or hospital" and a magnifying glass icon. Underneath the search bar, there is a section titled "Popular Medical Care Providers Near You" which displays five icons representing different medical providers. At the bottom of the interface, there is a footer that reads "Powered by HUMAN API" and "HIPAA-COMPLIANT", along with a blue button labeled "1 new". A blue arrow points to the search bar.

b. Once your client has located their hospital system(s) or medical provider(s), they will **enter their patient portal login credentials** and **click "Connect Account"**.

Connect to your account

Log into your account below to authorize the release of your Starfleet Medical data to John Hancock:

CONNECT ACCOUNT

By connecting my account, I declare that any health data retrieved from Starfleet Medical is mine or I have permission from the owner of the data to access it.

Powered by HUMAN API HIPAA-COMPLIANT 1 new

This screenshot shows a "Connect to your account" form. On the left side, there is a dark blue vertical panel with a white circular logo containing a star and the text "ABC Medical" below it. On the right side, there is a white form with the title "Connect to your account" and a sub-header "Log into your account below to authorize the release of your Starfleet Medical data to John Hancock:". The form contains two input fields: "Username" and "Password", followed by a "CONNECT ACCOUNT" button. Below the button, there is a disclaimer: "By connecting my account, I declare that any health data retrieved from Starfleet Medical is mine or I have permission from the owner of the data to access it." At the bottom of the form, there is a footer that reads "Powered by HUMAN API" and "HIPAA-COMPLIANT", along with a blue button labeled "1 new". Two blue arrows point to the "CONNECT ACCOUNT" button.

Once the accounts have been successfully linked, your client will receive an on-screen confirmation message. John Hancock will receive notification when the electronic health records are available to retrieve (usually within 24 hours) and will attach to the case for underwriting review.

Need help?

If your client needs assistance at any point during the authorization process, Human API's site offers a Live Chat feature. Their dedicated support team is available to help on business days between 9:00 AM – 8:00 PM EST.

Email template to send to client

Hello <insert applicant name>,

In order to process your application as quickly and accurately as possible, John Hancock needs to evaluate your medical history. This is typically done through the mail or fax retrieval of medical records from your medical provider and often takes several weeks to complete. However, we now have a process in place to obtain medical records electronically which is typically much faster than ordering from the medical provider and can allow a quicker decision on your application.

This process utilizes a third-party service provider, Human API. With your consent, Human API will enable you to share your digital health records to John Hancock directly through your provider's patient portal(s). A "patient portal" is a secure site where providers provide medical information related to medical visits, test results, health reminders, etc. The process typically takes only a few minutes and you'll be able to receive a copy of your medical records that you are sharing.

1. Please use the following link to start the medical record sharing process: **mydigitalrecords.com/johnhancock**
2. Enter your first name, last name, date of birth and email address
3. Search for your hospital system(s) or medical provider(s)
4. Enter your patient portal credentials, (username and password) and click "Connect Account"

Once you have connected your records, John Hancock will be able to continue processing your application.

If you have any questions while connecting your records, please utilize Human API's Live Chat functionality within the site or reach out to them at **help@humanapi.co**. They are happy to help guide you through the process.

Thank you,
